
RAMADHANTI

Analyst Lab

0895635929627 | im.ramadhanti@gmail.com | Jl. Menteng Sukabumi, Jakarta Pusat 10310 |

Detail-oriented **Biology graduate** with over 1 year of hands-on experience in **laboratory analysis**, including **proximate analysis** of raw materials and feed. Skilled in maintaining SOPs, laboratory instrumentation, and sample documentation. Familiar with **proximate analysis**, **GC-MS**, and **data analysis using SPSS**. Proven ability to work independently and collaboratively in lab environments.

Education

Al Azhar Indonesia University (Sept 2015-Aug 2022)

Biology (3.09/4.00)

Skripsi Details: "Proximate Analysis Of Sailfin Catfish (*Pterygoplichthys Pardalis*) Based On Sex From The Ciliwung River."

Conducted 14 proximate analyses on 30 fish samples, including fatty acid profiling using GC-MS, and processed the data using SPSS for One-Way ANOVA to ensure statistical accuracy. Results were effectively visualized through detailed graphs and charts created in Excel.

Skills

Laboratory Skill

- Proximate Analysis
- GC-MS
- PCR
- SOP Development
- Lab Instrument Handling

Analytical & Technical

- Data Analysis (SPSS, Excel)
- Report Writing
- Inventory Management

Analytical & Technical

- Attention to Detail
 - Time Management
 - Team Collaboration
-

Work Experience

Analyst Staff (Nov. 2020 – Dec. 2021)

PT. Satu Laboratika Utama

- Conducted and analyzed over 300 laboratory samples within 12 months, ensuring compliance with Standard Operating Procedures (SOPs). Organized and documented the results using Excel for efficient reporting to the supervisor.
- Authored and refined 10 comprehensive SOP documents, covering the proper use of equipment, handling of materials, and detailed work instructions for laboratory operations, utilizing Word to ensure clarity and accuracy.
- Oversaw the inventory management of laboratory supplies, tracked incoming and outgoing items, and performed detailed monthly stock-taking using Google Sheets to maintain accurate records and prevent shortages.

Internship

(July. 2018 - Aug 2018)

National Nuclear Energy Agency (BATAN)

- Performed chemical analyses on fish meat samples using the Proximate method to determine moisture, protein, fat, and ash content, and GC-MS (Gas Chromatography-Mass Spectrometry) to identify chemical compounds and contaminants over a 3-month period.
- Prepared laboratory equipment and materials before research, ensuring all tools were calibrated and ready for use, and maintained cleanliness and organization of the lab after research to comply with safety and quality standards.
- Accurately recorded research data, analyzed results, and compiled detailed reports for documentation and further review over the course of 3 months.

Assistant Lab

(Jan. 2017- Dec. 2019)

Al Azhar University of Indonesia

- Inspected and prepared laboratory equipment to ensure readiness and functionality for practical lab work.
 - Supervised and guided students during laboratory sessions, providing clear instructions and technical support throughout the process.
 - Developed and aligned educational materials, including lecture notes, practical manuals, pretests, post-tests, quizzes, and final exam assessments, to enhance student learning and evaluation.
-
