Lombok - Indonesia

I am a graduate of Biology study program at Mataram University and have a high curiosity and love for various fields that require deep attention in providing meaningful insights to make decisions based on data. Have a very good understanding in the field of Microbiology and have laboratory skills. Currently working on a food microbiology project focusing on coffee fruit fermentation to improve flavor quality and a livestock feed development project.

Work Experiences

Mataram — Lombok

Jan 2024 - present

Microbiology Research Assistant

Microbiology research assistant who assists in the process of isolation to identification of microbes at the genus level.

- Starting for research planning, develop research method, sample location survey.
- Preparation of research proposals, submission of research funding, scientific presentations.
- Harvesting coffee cherries, preparing samples from washing to sorting.
- Prepare the tools and materials needed during the research, sterilize the tools and materials such as fermentation jars, growth media, and other supporting tools.
- Starting microbial isolation, followed by a purification process to obtain a pure isolate that is ready for biochemical and physiological testing.
- Prepare the necessary biochemical and physiological test media, perform isolate rejuvenation.
- Conducting biochemical and physiological tests on the microbial isolates obtained, followed by characterization of each isolate.
- Conducting microbial identification at the genus level based on the characterization results obtained.
- conduct tests on acidity levels and caffeine levels.
- prepare samples for GCMS testing.
- create a research progress report
- scientific publications.

Education Level

SCUBE-CENTRE — Lombok

Oct 2024 - Jan 2025

Digital Business

Undergraduate in 14 weeks of intensive learning and hands-on practice with the business sector.

- Training program collaboration Seoul National University, University of Mataram, and National University with a duration of 14 weeks with mentors & practitioners who have experience in their field.
- Creat business plan and Market Analysis.
- Branding and Digital Marketing.

- Market Simulation : Successfully obtained a profit of 50% of total sales with sales strategies that adapt to market changes, predict market trends, optimize promotions, and increase competitiveness.

University of Mataram — Lombok

Aug 2019 - Apr 2024

Bachelor Degree in Science and graduate, IPK 3,36/4.00.

- Actively participated in the activities of biology students association of the faculty of mathematics and natural sciences.

Organizational Experience

Biology Students Association — Lombok

Jan 2022 - Dec 2022

General Treasurer

Biology Student Association is a organization in the Faculty of Mathematics and Natural Sciences

- Prepare work programs and periodic reports on organizational finances.
- Coordinate with the Head of the Biology Department, BEM FMIPA, and faculties regarding work programs and cooperation.
- Implement financial management, bookkeeping of incoming and outgoing money of the organization.
- Implement and supervise the preparation of budgets in every organizational activity.

Skills, Achievements & Other Experie

- **Internship RS. Universitas Mataram (2022)** : Basic Cell Culture
- **Projects (2024)**: Microbiology research in developing the taste of Arabica coffee.
- **Projects (2024)**: Microbiology research in animal feed development.
- **Skills**: Microsoft Office (Word, Excel, Power Point), Canva, Laboratory Skills, Characterization of microb, Business models and design, Copywriting, Writing skills.
- **Others**: Quantitative Research, Analytical Thinking, Adaptive, Collaboration, Time management, Accuracy, Multitasking, Commitment, Discipline, Teamwork.
