SUMMARY

Experienced in quality assurance and quality control, research and development product, customer relations, and business operation. Currently, my task is to control product quality and develop products according to requests from consumers and market analysis. Have experience in public dedication, organization, and event committees. I am dynamic and action-oriented. likes working in agro-complex fields and dealing with lots of people. I have excellent adaptive skills, a growth mindset, and an interest in learning new things with the next company.
