tamaportofolio.webflow.io

I'm a Information Systems graduate with concern in UIUX Design, Systems Analysis, IT Support and Web or App Mobile development use low code development. Expertise in UI/UX design to design solutions that significantly enhance user experiences across diverse platforms. Detail-oriented progress with a strong foundation in systems analysis and troubleshooting.

WORK EXPERIENCE

UIUX Design

Feb 2024 - Apr 2024

Digitalent Scholarship

Jakarta, Indonesia

- Conducted in-depth market research and competitive analysis, and identifying new market opportunities.
- Reviewing a user input from the marketplace to identify user problems when using the application.
- Provide feedback in the form of a design from the form of answers to user problems and result testing 80 % user succes.
- Creating a basic initial appearance of the app design before heading to high fidelity by paying attention to the identification of the user journey.
- After the product has been designed with a new look, user testing is satisfied with the appearance and journey on the app compared to the previous appearance and journey, as evidenced by around 80% more users being able to do the tetsing task smoothly.
- Analyzed user challenges to provide actionable insights and solutions that enhanced the application's functionality and user satisfaction.
- Collaborated with UX/UI teams to ensure designs effectively addressed user pain points and improved overall system usability.

IT Support

May 2022 - May 2023

SDN 2 Pelemkerep

Jepara, Indonesia

- Solving problems related to hardware (PC, Laptop, Printer, CCTV), Software (Microsoft, Media Player, etc.) and Network Installation.
- Preparing devices and software for CBT-based school exam preparation.
- Making activity reports for reporting to educational institutions with the help of Microsoft Excel and Word.
- Teaching computer and graphic design extracurriculars.
- Resolved hardware and software issues while installing network systems, resulting in a 30% reduction in downtime for users.

Android Mobile Development

May 2022 - Dec 2022

Studi Independent Bersertifikat

Bandung, Indonesia

- Participated in **brainstorming sessions** and provided **innovative solutions** to **technical challenges**, leading to the **adoption of new technologies** and **improved development workflows**.
- Demonstrated **strong problem-solving skills**, quickly identifying and resolving **critical production issues**, and improving **application stability**.
- Implemented **Android App Bundles** to **optimize APK sizes**, reducing **app download size** and improving **installation rates**.
- Utilized **analytical skills** to identify and resolve **critical system issues**, and significantly improving **application stability**.
- Provided **technical guidance** and **documentation** on **application workflows** to support **development teams** during **debugging** and **development processes**.
- Developed a technology sector job seeker application that streamlined the application process for users, resulting in a 50% increase in successful job applications.

Internship Project Course

Jan 2022 - Mar 2022

Elementry School State 2 Pelemkerep

Jepara

- Collect and analyze data related to existing inventory processes.
- Create system specification documents that include flow diagrams, ERD (Entity Relationship Diagram), and userflow, user interface.
- Designing a database structure using XAMPP as a local server and MySQL as a database management system.
- Implement features such as item registration, stock management, and inventory reports.
- Perform system testing to ensure all features function properly and collecting feedback from users for further improvements.
- Prepare technical documentation and user guides for the system being developed.
- Implemented features such as item registration, stock management, and inventory reports, resulting in a 30% increase in inventory accuracy.

Developer

Jan 2022 - Mar 2022

MagangJoja

Yogyakarta

- Designed and developed a reusable React component library, reducing development time for subsequent projects by an average of 30%.
- Participated in customer feedback sessions, implementing key UI/UX improvements that resulted in a 15% decrease in customer support inquiries.
- Developed and implemented new frontend features, resulting in a 15% increase in user engagement
- Improved team collaboration and knowledge sharing by introducing collaborative tools and conducting regular knowledge-sharing sessions, resulting in a 30% decrease in siloed work.

AWARDS

Best Participant FGA Kominfo by Digitalent Kominfo	Apr 2024
Awards are given to the participants who have the best performance in the showcase as well as the tenacity of the participants and the assessment of the participants in the same class.	

LANGUAGES

Indonesia (Professional working proficiency) • English (Elementary proficiency)

PUBLICATIONS

Uji Usability dan User Experience Website Sistem Informasi Akademik Universitas Terbuka (SIA UT) Berdasarkan Perspektif Mahasiswa Menggunakan Metode USE Questionnaire dan Cognitive Walkthrough ↗ on Program Studi Teknik Informatika Universitas Pamulang	Oct 2023
The effectiveness and efficiency of the Open University Academic Information System (SIA UT) website in facilitating communication and information delivery between universities and students is very crucial to discuss considering the fact that UT students are spread throughout Indonesia and participate in distance learning. The purpose of this study is to conduct measurable testing to determine the level of usability and user experience and to obtain recommendations for improvements to the system when viewed from the perspective of UT students. The research method used to measure Usability uses the USE Questionnaire with measurement parameters of Usefulness, Ease of Use, Ease of Learning, and Satisfaction. Usability testing using the CW method provides recommendations for improvements that can be the basis for UT to continue to improve and develop the SIA UT website to better meet the needs and expectations of students, especially those who follow the distance learning system.	

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Member	Jan 2023 - Present
GDG Semarang	Semarang, Indonesia
As a member of GDG (Google Developer Group) Semarang, I participate in various events, workshops, and meetups to deepen understanding of Google technologies, such as Android, Flutter, Firebase, AI/ML, Cloud, and others. Additionally, I interact with developers, designers, and other technology professionals to share ideas, experiences, and build collaborations. I contribute to the community by sharing experiences or expertise, either through presentations, mentoring, or discussions. By becoming a member of GDG Semarang, you are part of a community that supports innovation, learning, and collaboration in the world of technology. <i>Participated in events, workshops, and meetups to enhance knowledge of Google technologies, resulting in a 30% increase in community engagement and collaboration among local developers.</i>	
Student Member	Sep 2023 - Jun 2024
GDSC UDINUS	Semarang Indonesia
As a member of Udinus' Google Developer Student Clubs (GDSC), I am part of a student community dedicated to learning and applying Google technology and creative solutions to solve real-world challenges. In this community, I participate in workshops, seminars, and hackathons to understand and master technologies such as Android, Cloud Computing, and AI/ML. I take advantage of opportunities to improve technical, leadership, and other soft skills. Joining GDSC Udinus is a step toward becoming part of a global student community that inspires innovation, collaboration, and continuous learning!	
Deputy Head of Division	Jan 2023 - Jan 2023
IKMA UT Jateng	Jawa Tengah
Created and implemented cadre formation strategies that improved volunteer engagement by twenty percent.,Maintained an organizational environment that enhanced the efficiency of work programs, resulting in a fifteen percent increase in project completion rates.,Fostered solidarity and a sense of kinship among members, leading to a twenty-five percent increase in member retention.,Communicated internal regulations to all members, ensuring a compliance rate of ninety-eight percent.,Reviewed cases and conflicts in collaboration with Domestic and Foreign Divisions, resolving issues with a success rate of eighty-five percent.,Collaborated with relevant institutions on human resource development, law, and human rights, successfully establishing three new partnerships.	

PROJECTS

My Personal Website ↗	Mar 2024 - Aug 2024
A personal website designed to showcase a developer's professional work and experience. Built with a modern and interactive design, this website highlights various projects, skills, and achievements in the field of web development and technology. This website includes a project portfolio that displays various creative and technical projects that have been worked on, complete with interesting details and visuals. Provides an overview of the developer's skills, experience and career journey. Designed to be easily accessible across a variety of devices, including desktop, tablet and mobile. Interactions use smooth animations and intuitive navigation to provide a pleasant user experience.	
School Inventory Administration Website ↗	Jan 2022 - Mar 2023
The School Inventory Administration Website is a platform designed to streamline the management of school assets and inventory. It enables administrators to efficiently track, manage, and report on school resources, ensuring transparency and accountability. The system will be developed using the SDLC (Software Development Life Cycle) methodology to ensure structured and organized development processes, from planning through to post-launch maintenance. Responsible for gathering requirements, designing system architecture, and ensuring that the system aligns with user needs and business goals.	
Statistik Peminjaman Buku ↗	Jan 2023 - Jan 2023

This project is a book lending management application that aims to simplify the management of borrowing data and provide data-based insights. This system includes the main features store borrowing information such as book name, borrowing date, rental price, and return date. Calculate total rental costs based on loan duration and rental price per book.

Provides complete reports regarding total loan costs per user. And produces a pie chart that displays book borrowing statistics per user. This project is designed to increase the efficiency of book lending maintenance while providing insights that can support decision making, such as promotions or book inventory management.

SKILLS

Tools: , Notion, Google Tools, Miro, yED-Graphic, Edraw Min Map, Microsoft Office, Visual Studio Code, Scratch

Hard Skils: Software Development Life Cycle (SDLC), JavaScript, HTML, CSS, IT Support, Microsft Office, Database, System Analyst

EDUCATION

S. Kom

Univeristas Terbuka

- Selected Participants of the Institute for Research and Community Service in 2023 in the Field of Application of Technology Utilization
- Participated in the design of the fieldwork practice system of the information studies program.

Apr 2020 - Nov 2024

GPA: 3.8 of 4.0
