ABOUT ME

Imam is an animal husbandry enthusiast, especially in the development of livestock product technology. practical experience, helped me develop important skills, including livestock management. Good communication and teamwork skills make me able to unite opinions from various parties into a unified vision for the sustainability of the company. I am excited to start a career in animal husbandry and want to make a meaningful difference in this field. With my knowledge of the farm, I hope to contribute and with dedication and enthusiasm to work in this field, I would welcome the opportunity to discuss how I can be a valuable asset to the company
