Summary of Qualifications

I'm a fresh graduate of Animal Industry Engineering, Universitas Gadjah Mada. I'm able to work in team, multitasking, have a good time management and likes learn new things. Have internship experiences in research and manufacturing of feed. I'm interest to quality control and quality assurance in feed industry. I have a certification in quality assurance in feed industry, internal audit, GMP, HACCP, ISO 22000: 2018 and FSSC.

Education Background

- | | |
|-------------|--|
| 2024 | : Animal Industry Engineering
Universitas Gadjah Mada
GPA 3.94/4.00 |
| 2019 – 2023 | : Bachelor's Animal Science and Industry
Universitas Gadjah Mada
GPA 3.56/4.00 |

Internship and Work Experience

✓ **Quality Control Quality Assurance Intern | Charoen Pokphand Indonesia Plant Demak (August – November 2024)**

- Understanding processing of production feed. The process of preparation - intake - mixing - pelleting and packing.
- Understanding the type of raw material ingredients for making feed.
- Understanding receipt process of raw material.
- Knowing physical and nutrition test of raw material.
- Understanding of material receiving process in warehouse and testing of physical and nutrition before saved.
- Corn as main raw material saved in silo, knowing receiving of corn and intake processing to silo. Maintenance of temperature and nutrition of corn checked everyday. Identification of hotspot and how to handle hotspot in silo.
- Knowing how to sampling regularly of raw materials in warehouse to check quality of physical, nutrition and contamination after saving in warehouse. Prevention of insect to avoid raw materials damage.
- Understanding feed testing sized, color, pellet durability index (PDI), temperature, water content of feed.
- Understanding quality control feed testing before packing.
- Knowing of processed of packing of feed used packing machine until ready to save in warehouse.
- Understanding of First In First Out (FIFO) in raw material and finish good of feed.
- Checking feed labels according to Standar Nasional Indonesia (SNI) standard and Peraturan Menteri Pertanian (Permentan) regulation.

✓ **Research Assistant | Universitas Gadjah Mada (May - July 2024)**

Research about utilization of laying hen waste as a non-conventional feed. The research is collaboration of Faculty of Animal Science UGM and Sawo Jaya Farm.

- Preparing tools, materials and feed ingredients for research.
- Mixing all feed ingredients: protein source, energy source, laying hen waste, molasses and SBP until well mixed.
- Fermentation of feed in aerobic and semi-anaerobic, 9 silo of anaerobic and 9 silo of semi-anaerobic with total weight 1.800 kg
- Pelleting and drying pellet.

✓ **Staff Human Resource and General Affairs | Hoshizora Foundation (August 2023 – August 2024)**

- Managing daily, weekly and monthly database and administrative staff.
- Submitting proposal and report program activities.
- Help operational manager to financial reports and BPJS payments.
- Drafting and organizing internal documents.
- Help Human Resource Staff for recruitment volunteers: selected documents, interviewing and briefing volunteers.

✓ **Studi Independen | Merdeka Belajar Kampus Merdeka Kemdikbud (Mar-Nov 2022)**

Title: Effect of Whey as Addictive on Quality Fermented Total Mixed Ration.

The research to aim the effect of whey as moisturizer in total mixed ration. Total mixed ration was fermented for 30 days, each treatment used 3 replications. Test at this research are: physical test, proximat [dry matter (DM), organic matter (OM), ether extract (EE), crude protein (CP) and crude fiber (CF)], microbial, pH, ammonia and lactic acid.

Result:

- Whey as a re-moisturizer had no significant effect on dry matter (DM), organic matter (OM), ether extract (EE), and crude fiber (CF).
- The use of whey as a re-moisturizer on fermented total mixed ration production did not significantly affect the concentrations of ammonia and lactic acid. In physical tests, the use of whey as a re-moisturizer improved the color quality, density, and texture.
- The research result show whey can be utilized as moisturizer.

✓ **Internship | Bhumi Nararya Farm (December - January 2022)**

- Rearing dairy goats starting from birth, pre weaning, and productive with total population 750 head.
- Managing feed maintenance, milking, packaging of fresh milk and distribution to powdered milk processing activities. The amount of fresh milk production is $\pm$ 300 L/ day.
- Participate in cheese production (feta and tome), use 180 L of fresh milk for each production process.

✓ **Internship | PT. Pahlawan Pangan Indonesia (September-December 2021)**

- Responsible to processing fresh milk into product pasteurized milk, yoghurt, ice cream and gelato until packaging product. Total product 150-200 pack/ day.
- Ensuring availability of raw materials for manufacture and packaging product.
- Checking the quality of fresh milk (fat, protein, lactose, water content and pH).
- Processing fresh milk into product.
- Packaging products until ready to marketed.

Training

- | | |
|--|--------|
| ▪ Good Manufacturing Product (GMP) | (2024) |
| ▪ Hazard Analysis and Critical Control Point (HACCP) | (2024) |
| ▪ Food Safety Management System ISO 22000: 2018 | (2024) |
| ▪ Food Safety System Certification (FSSC) ver. 6.0 | (2024) |
| ▪ Internal Audit in Food Industry Based on ISO 19011: 2018 | (2024) |
| ▪ Quality Assurance (QA) of Feed Industry Based on ISO 9001:2015 | (2022) |
| ▪ XL Axiata Future Leaders (XLFL) Leadership and Soft Skills Development | (2022) |
| ▪ Sahabat Percepatan Peningkatan Kepemimpinan Mahasiswa (SP2KM) UGM | (2020) |

Skills

- **Google Workspace**
- **Microsoft Office**
- **Problem Solving**
- **Communication**
- **Time Management**
- **Manage Database**
