Fresh graduate student at Andalas University majoring in Animal Science who is interested in agricultural social economy. I have internship experience in the Edufarm Andalas University from 9 January 2023 up to 27 February 2023. I have good in livestock operational management, data analysis using tools like excel, SPSS, or another analytical tools. My thesis research focuses on broiler partnership management system. The study aims to process where a core company purchases broilers raised by contract farmers (plasma), the relationship and transactions between these two parties follow a structured process. Although I may not have extensive work experience, the company can still gain significant value from my adaptability, creativity, technological skills, and enthusiasm to learn and grow as a fresh graduate.

EDUCATION

Andalas University – Padang City, West Sumatera

Aug 2019 – 2024

Bachelor Degree in Animal Science, 3.75/4.00

- In my college During my time in college, I joined a student activity unit called Academia Young Entrepreneur, which aims to enhance the entrepreneurial spirit among students. While being part of this organization, I also served as a committee member for a national-scale business plan competition, where I was responsible for fundraising. This event was one of the work programs of my division in the AYE organization, specifically the internal-external division.
