

Bagus Suryawan
Animal Husbandry Technician

+62 823-3105-1474 | bagusssoers95@gmail.com | Surabaya, Jawa Timur

SUMMARY

Animal Science graduate with a **strong track record of field-based experience in poultry, dairy, and ruminant production**. Actively involved in managing **large scale operations** from raising 4,500 laying ducks and 20,000 DOC vaccinations, to hands on production of silage, feed, and post harvest processing. Known for a **practical, problem-solving mindset** and a passion for integrating animal welfare with production efficiency. Experienced in working under pressure, adapting quickly in diverse livestock settings, and collaborating with multidisciplinary teams. Enthusiastically interested on impactful roles in livestock production, agribusiness, or food supply chains that value innovation, quality, and continuous improvement.

EDUCATION

D3 – Animal Husbandry

Universitas Sebelas Maret | 2020 – 2023

GPA : 3,61

Final Project : *Manajemen Analisis Usaha Penggemukan Sapi di Setya Lembu Multi Farm*

WORK EXPERIENCE

CV Sahabat Ternak - Field Livestock Technician

August 2024 – April 2025

- Supervised the daily management of 4.500 laying ducks, including feeding schedules, sanitation, and health monitoring
- Formulated and produced mixed feed with a monthly production volume of up to 2,5 tons
- Handled the starter and grower phases of duckling, including acclimatization, early stage health assessment, and productive stock selection
- Conducted selection of high performing layers based on feed conversion ratio and egg production consistency

Mitra Usaha Burung Puyuh - Product Processing Staff

November – December 2022

- Managed the processing of frozen food products derived from 5,000 culled quails, ensuring consistency and quality throughout the production cycle
- Oversaw slaughtering, feather plucking, evisceration, and carcass classification in compliance with food safety and quality standards
- Performed packaging and freezing processes, coordinating product readiness for distribution to over 100 retail outlets
- Maintained workplace hygiene and strictly implemented food safety and halal protocols throughout all stages of production

CV Griya Ternak Farm - Livestock Maintenance Assistant

September - October 2022

- Assisted in the daily care and management of 25 dairy cows and 300 sheep, ensuring optimal animal health and productivity
- Performed milking operations and comprehensive livestock maintenance, including monitoring behavior and identifying early signs of illness
- Managed feed formulation, supplement distribution, and routine barn sanitation to maintain hygiene and prevent disease outbreaks

CV Sinatria Farm - Field Technician*July – August 2022*

- Managed the manual production of silage and mineral blocks with a total capacity of 500 kg, supporting nutritional needs of small ruminants
- Responsible for the daily care of 50 sheep, including feeding, vitamin supplementation, and routine pen sanitation to ensure animal health and productivity

PT Unggas Makmur Indonesia - Internship*January - February 2022*

- Assisted in feed and vitamin management for broiler chickens according to growth phases to optimize weight gain and feed conversion
 - Conducted vaccination of 20,000 Day-Old Chicks (DOC) as part of the flock health management protocol
 - Recorded production performance metrics and supported report preparation and biosecurity implementation in poultry houses
-

Skills

- **Livestock Husbandry Management** (poultry, sheep, dairy cattle)
- **Feed Formulation & Silage Production** (including mineral blocks and poultry feed mix)
- **Animal Health Handling** – Vaccination, vitamin supplementation, and basic disease detection
- **Food Safety & Hygiene Compliance** in animal product processing
- **Halal Slaughtering** – *Certified Halal Butcher (Juleha)*
- **Quality Grading** of animal products (eggs, carcasses, milk)
- Use of **Microsoft Office** (Excel, Word) for daily reporting
- Strong field **adaptability** and on-site communication
- **Team collaboration** and task coordination in farm settings
