

HILDA DIANA PRATIWI

CHEMICAL ENGINEERING

Purworejo, Central Java | hildadianapratiwi@gmail.com | (+62) 882-1611-0258

SUMMARY

I am a Chemical Engineering graduate seeking to apply my strong academic foundation and practical experience in production and quality control within an innovative and forward-thinking organization. I look forward to contributing to a dynamic team and supporting process development, improvement, and operational excellence in the manufacturing industry.

EDUCATION

Bachelor of Chemical Engineering

Aug 2020 - Jan 2025

Universitas Negeri Semarang, Semarang

- GPA: 3.79/ 4.00

PROFESSIONAL EXPERIENCE

PT Sinar Tambang Arthalestari

Apr 2023 - May 2023

Quality Control

- Conducted physical and chemical testing on various types of cement to ensure quality standards.
- Checked parameters such as Blaine, setting time, strength, residue, free lime, and Loss on Ignition (LoI).
- Researched the effect of fly ash on gypsum addition in setting time testing for PPC-type cement.

PT Sinar Tambang Arthalestari

May 2023 - June 2023

Production

- Studied and understood the end-to-end cement production process while observing the operation of production equipment to enhance technical comprehension of the industrial system.
- Collected and analyzed plant downtime data from January to December 2022.
- Conducted kiln unit efficiency analysis through mass and energy balance calculations in May 2023.

PT CADFEM Simulation Technology Indonesia

Aug 2023 - Dec 2023

Computation Fluid Dynamics

- Mastered basic fluid properties, fluid statics, and kinematics for engineering applications.
- Skilled in analyzing viscous laminar flows and simplifying complex systems using analytical methods.
- Completed international certification and a real-world renewable energy project using fluid dynamics

PROJECTS

Research Assistant – Lecturer's Project

Dec 2023 - Mar 2024

- Conducted research on zeolite synthesis using fly ash and rice husk through the hydrothermal method.
- Performed material characterization to analyze the structure and properties of the synthesized zeolite.
- Evaluated the effect of raw material variations to support the use of industrial and agricultural waste in material development.

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Teknik Kimia Universitas Negeri Semarang

Oct 2020 - Dec 2020

Equipment Division Staff

- Handled technical and logistical setup to ensure smooth execution of an event attended by 100+ participants from UNNES and external institutions.
- Prepared timekeeping tools, exam materials, and assisted speakers during discussion sessions.
- Coordinated all equipment needs from pre-event setup to post-event wrap-up.

Dewan Perwakilan Mahasiswa Teknik Kimia Universitas Negeri Semarang

Dec 2021 - Jan 2022

Secretary

- Handled administrative tasks and documentation during a faculty-wide congress involving all academic members and student organizations within the Faculty of Engineering.
- Managed official correspondence, attendance, and certificates.
- Facilitated smooth coordination between committees, delegates, and presidium.

Purworejo Creative Festival

July 2023

Volunteer

- Supported the execution of a district-level cultural festival in Purworejo, featuring 50+ culinary tenants from all sub-districts and regional art performances including dance, music, theater, and visual arts from Purworejo, Solo, Magelang, and Malang.
- Managed logistics, consumption distribution, and event equipment to ensure smooth program flow.
- Assisted real-time coordination and reporting to the field coordinator during the event.

ADDITIONAL INFORMATION

- **Software :** Microsoft Office, Visio, Aspen Hysys, Ansys
- **Languages:** Indonesian, English (CEFR-B1)
