SUMMARY

Animal Feed and Nutrition Specialist with a solid academic foundation in animal science, focusing on feed formulation, animal nutrition, and functional feed innovation. Holds a Bachelor's degree in Animal Science with hands-on experience in poultry and ruminant feed development. Skilled in laboratory analysis, scientific research, and collaborative project implementation, with a strong commitment to advancing sustainable livestock production through science-based and innovative approaches.

EDUCATION

Bachelor of Animal Science (IPB University) – GPA 3.65/4.00 **Aug 2021 – Aug 2025**

- Understand the principles of animal nutrition and feed quality standards, and be directly involved in testing the quality of raw materials and finished feed through proximate analysis, microbiology, and nutrient content in the laboratory.
- Know the flow of feed production from receiving raw materials to packaging, and understand the application of HACCP, GMP, and ISO systems in ensuring product quality and identifying critical points in the production process.

PROJECTS

SO-Feed Formulation App for Ruminants **Apr 2024 – Nov 2024**

Nutritional modeling and software development project (PKM KI 2024)

- Designed a digital tool to formulate balanced rations based on nutrient requirements and estimated methane emissions using empirical models.
- Key skills: Feed formulation, nutrition modeling, software prototyping (Excel-based + Python concepts), greenhouse gas estimation, data visualization.

Milkvee Wafer **Aug 2024 – Dec 2024**

Wafer feed supplement for dairy cattle

- Developing innovative wafer-based feed supplement products for dairy cattle.
- Conducting trials and evaluating product effectiveness on dairy cattle health and productivity.
- Achieving positive responses from livestock partners during the product sales period.
- Key skills: improving entrepreneurial skills, project management, and teamwork in developing agro-industrial products.

Final Project (Skripsi) **Nov 2024 – Dec 2024**

Broiler chicken performance through supplementation of vitamin E and selenium in feed containing lemur fish oil

- Design and conduct scientific research to evaluate the effect of vitamin E and selenium supplementation in lemur fish oil-based feed on broiler chicken performance.
- Mastering broiler chicken maintenance techniques under research conditions and being able to monitor growth, feed conversion, and livestock health systematically during the research period.

- Key skill: data interpretation, scientific reporting, spss system operation

WORK EXPERIENCES

CV Puput Bersaudara – Bogor

Jan 2023 – Feb 2023

- Play a role in daily maintenance activities of beef cattle, including feeding, pen management, and monitoring livestock health to ensure optimal livestock management and in accordance with hygiene standards.
- Key skill: practical understanding of beef cattle farming techniques and efficient farm management.

Unit Pendidikan dan Penelitian Peternakan Jonggol , PT Prima Agrostis Nusantara, PT Santana Manggala Karya – Jonggol

Jun 2023 – Jul 2023

Praktik Kerja Lapang

- Carrying out sheep care and maintenance including feeding, pen management, and monitoring livestock health as well as managing green fodder cultivation from land preparation to harvest to support the quality of livestock feed.
- Involved in the production process of Sorinfer complete feed which combines Indigofera as a protein source and sorghum as an energy source through fermentation technology to increase the nutritional value of the feed.
- Key skill: Developing technical capabilities in livestock maintenance, green fodder cultivation, and fermented feed production based on agro-industrial technology.

Kuliah Kerja Nyata Tematik – Bogor

Jun 2024 – Aug 2024

- Introducing urban agriculture, participating in integrated health posts, developing business logos and branding concepts, socializing clean and healthy lifestyles in the school environment.
- Explaining interpersonal communication skills, problem solving, and cross-disciplinary teamwork in community-based activities.

ORGANIZATIONAL

HIMASITER (Himpunan Mahasiswa)

Aug 2022 – Dec 2023

Staff Biro Ilmu dan Keprofesian

- Involved in the implementation of poultry, ruminant and forage farming programs to enhance members' practical understanding of field activities.
- Key skills: event management, effective teamwork and communication, problem solving.

HIMASITER (Himpunan Mahasiswa)

Aug 2023 – Dec 2024

Badan Pengawas

- Supervise the implementation of the organization's work program to ensure compliance with the rules, transparency, and accountability in every activity of the association.
- Key skills: the ability to supervise, evaluate, and provide recommendations for improvement to maintain the integrity of the organization.

ADDITIONAL INFORMATION

Languages : Indonesia, English

Certifications : 7 Habits by Dunamis

Award : Funding for the 2024 Student Creativity Program (PKM) in the Field of Innovative Work, 3rd place winner of non-pimnas pkm poster competition
